6. Climate change and the Pacific Northwest

The scientific and science-based popular literature on climate change in the Northwest and beyond is vast and growing. We offer the following selected resources, some of which we have already seen in other portions of the course, as only a sample of this growing body of work. WNPS encourages you to keep abreast of emerging scientific and political information regarding this critical subject.

This list contains references that apply to either Eastern or Western Washington or similar ecoregions, along with some that are relevant to both. Choose the references that apply to your ecoregion or area of interest.

Literature

Bachelet, D., B. R. Johnson, S. D. Bridgman, P. V. Dunn, H. E. Anderson and B. M. Rogers. 2011. **Climate change impacts on western Pacific Northwest prairies and savannas.** Northwest Science 85:411–433. <http://www.bioone.org/doi/pdf/10.3955/046.085.0224>

Carswell, C. 2013. **The Tree Coroners.** High Country News, December 9, 2013.
